

Pavimenti in legni preziosi

The company

Xilopav Srl was incorporated 10 years ago as a small manufacturing unit for the realization of floorings for other brands. The philosophy behind this new operational unit began to take shape from the very beginning: a special care in the selection of quality materials and in the execution of the final product.

In 2010 the company entered the flooring market in a direct way developing two new product lines: ATELIER and PLANCE TZ/NZ.

Xilopav subsequently expanded its range of solutions and turned to interior design with more and more difficult flooring realizations that gradually became the company's core business. QUADROTTÉ is a new line dating up to this period and which is different from the flooring in planks. Often coming directly out of our client's design, the floor is no longer just a surface apt to walk on, but it becomes part of the furniture, a composing element that enhances the intimate and cozy atmosphere of your house.

A new impetus came from the development and use of innovative treatments of the raw materials able to enrich them with colors and shades that could not be obtained before. The materials' surface is not dyed or treated with unstable and impersonal colors, but it is subjected to a thermo – treatment at the structural level, which gives the final product a variety of shades and exciting colors. In order to take full advantage of the "Thermowood" characteristics and to highlight all the aesthetic and technical qualities deriving by its application, Xilopav started a series of projects in co-design, jointly collaborating with architecture and design studios and continuously improving to meet the expectations and desires of each customer, thus making a step towards new concepts and new goals. In this period Xilopav began a new creative and productive path within the world of fashion design with the realization of some showrooms for the most prestigious Italian and foreign brands.

The combination of research, daring experimentation of new materials, custom design and technologically advanced manufacturing alternated to hand-made production, makes our floorings a unique, distinctive element in an increasingly globalized market.

“Each creation of our production is a perfect combination of passion, skills, innovation and creativity: beautiful surfaces that convey the warmth of the material, to be touched, felt and intensely lived with all your senses!”

Thermowood European Oak

Thermowood Oak plank.

Thermo-treatment intensifies the natural shades in the tonalities ranging from Moka to Choco. Moreover, it enhances the wood grains and increases the durability and UV resistance. The result is a flooring with wonderful shades of colors. Something perfect to turn a room into a warm and welcoming space.

Mosaico 192

Mosaico 192 tile.

Made with 192 pieces of natural oak this flooring is a small mosaic finished with a light transparent coating exalting the natural grains of the oak.

Mosaico 192 Thermowood

Mosaico 192 Thermowood tile.

With the same pattern of Mosaico 192, Mosaico 192 Thermowood is made with thermo-treated oak. The brown color obtained thanks to this treatment totally changes with light and dark shades.

Torino Thermowood

Torino Thermowood tile.

The Torino flooring is technically an Italian herringbone made in tiles. Once the tiles are connected the effect is a square pattern perfectly matching together.

This flooring is made in thermo-treated Oak.

Versailles Thermowood

Versailles Thermowood tile.

One of the most iconic and well-known wood flooring revisited using the thermo-treatment.

The result is a classic flooring with a game of shades of colors perfect for luxury retails or villas.

Montecarlo

Montecarlo tile.

Montecarlo is perhaps one of the most beautiful tile. Its elegance, its simplicity and its exclusive line made it the perfect flooring for high-end residential projects.

Montecarlo is available in oak and in oak Thermowood.

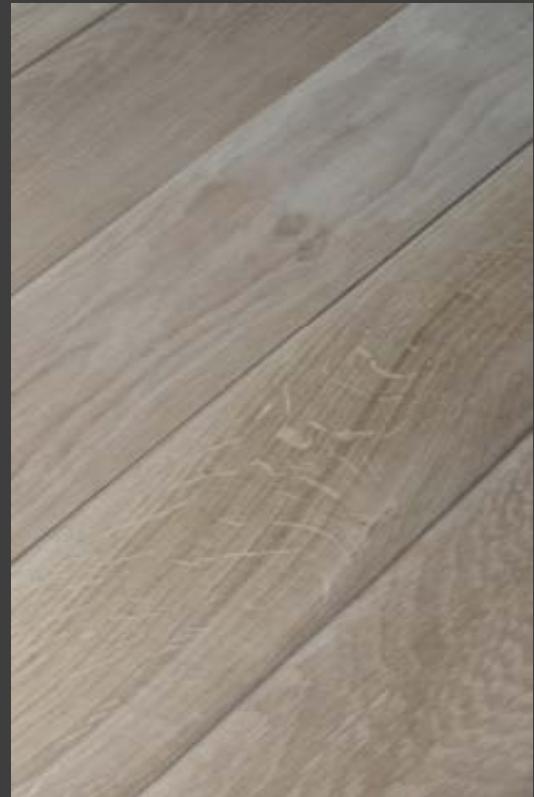

Zurigo

Zurigo French herringbone

Zurigo imitates an old classic villa wood flooring with the typical signs of the time.

It's a totally handmade masterpiece: imperfection, in this case, becomes an added value.

Zurigo is available in oak with the finishing chosen by the client.

Desquared

Desquared tile.

Made with figured white Sycamore, Desquared is an innovative wood flooring. All the pieces of wood have different measures creating a discontinuous pattern. The 3d figured effect made this flooring shining and eye-catching.

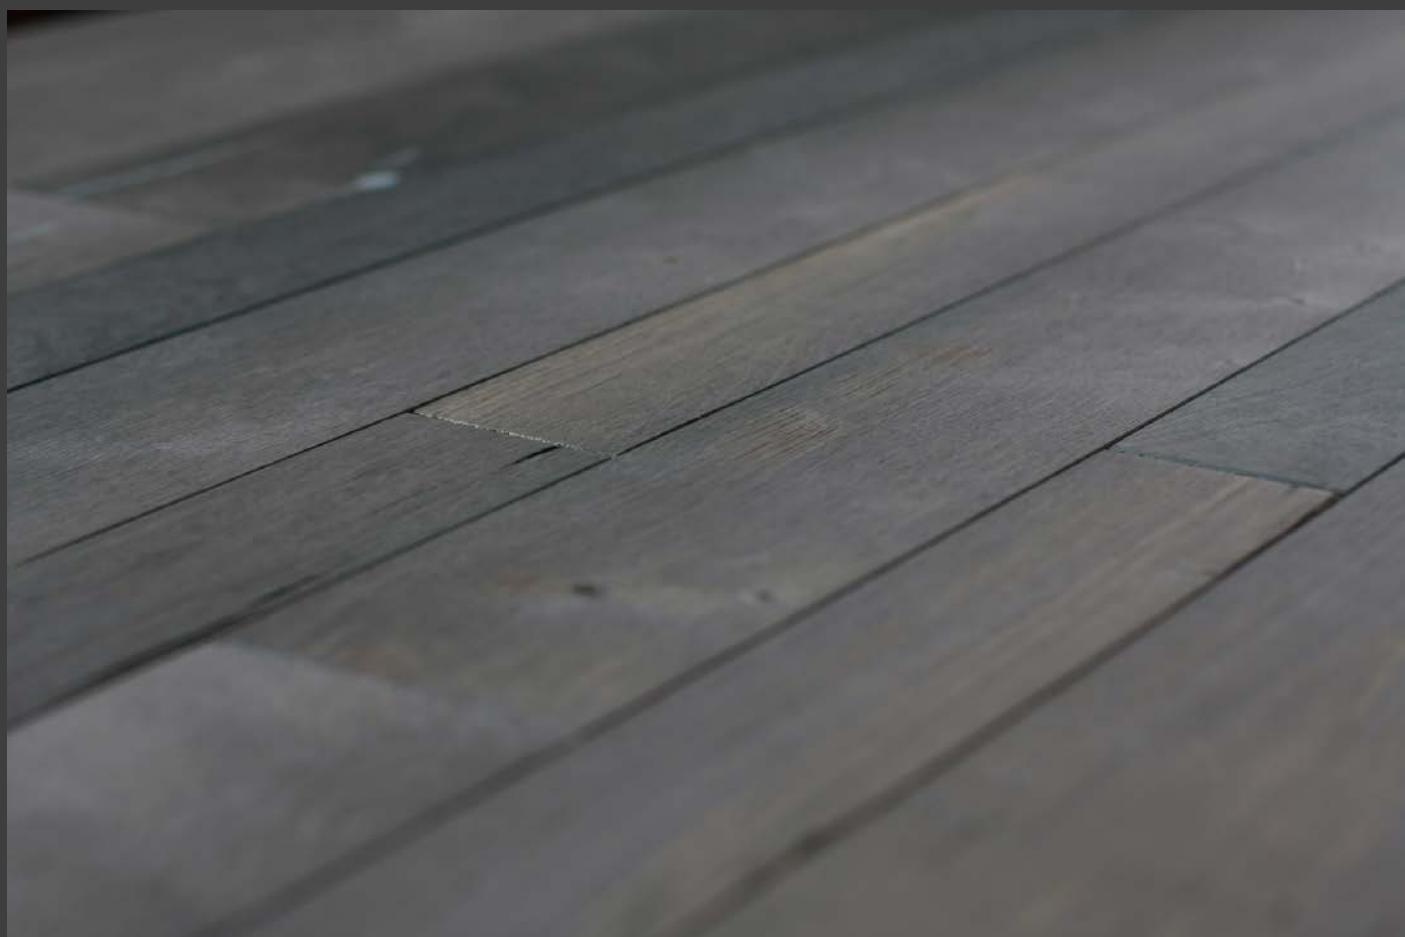

StoneOak® Modulo Zero

It's called StoneOak® because its texture and colors remind the colors of the stone. It is a millennial wood recovered from the ground.

This unique material together with our woodworking expertise gave birth to StoneOak® Modulo Zero.

Modulo Zero means that all the pieces have different sizes and lengths so to create always different floorings, that in your house become a piece of furniture and decor.

Tailor made

We are wood craftsmen, we love to hear ideas from our customers and try new things.

If you are looking for someone to develop something special and unique we are the right company for you.

We are ready to support your ideas and advise you on materials.

We work with many different wood species from the common ones to the most sought-after species.
