# FAEMINA

Where exclusive design and art of coffee meet bringing Gruppo Cimbali in the home segment the first time

**Faemina**, where exclusive design meets a new form of art, the one of high-quality coffee. A new machine leading Gruppo Cimbali in the home bar trend for the first time. Taking the pleasure of enjoying high-quality coffee at home.

Faemina is a unique machine, exclusive in its aesthetics while combining innovation and design, offering an excellent quality performance for both coffee experts and those desiring an emotional, yet high-quality, coffee experience.

## Design as a Protagonist

Its aesthetics made by **ItalDesign** – synonymous with Made in Italy – makes Faemina a true design icon. Elegant in its style and minimal in its shape, it comes in **two stylistic choices**: the *Urban Color*, anodized aluminum with a contrasting body of glossy finishes that range from black to white, and all the way to the Pantone colors of 2021. A chicer version is the *Classy*, characterized by fine materials like lucid aluminum with a combination possibility of satin copper or an elegant glossy black.

All the elements and materials selected, have been studied and developed attentively to deliver the best performance and assure the product's durability over time.

Faemina is not only a decorative item but a true icon inside out.

## High Quality Coffee in the Comfort of Your Home, and More

Faemina is more than just an espresso coffee machine, it's an exclusive element that symbolizes a high-quality lifestyle.

A **luxury and design icon** that enhances any environment it is placed in, thanks to its elegance in shape and style. Faemina is not only thought for the home bar trend but also for **higher-end professional settings** like boutiques, concept stores, bistros, and any other small to midsize businesses that aim to provide an emotional coffee experience to their customers.

## High Performance

Faemina is synonymous with high-quality performance.

The exceptional quality in a cup is guaranteed by a **water softener filter**, integrated inside the reservoir. Assuring the correct decalcification process and allowing for the adequate maintenance of the machine and its durability over time. High-quality water not only delivers first-class espresso but also enhances all the other coffee-based beverages that one can create with the Faemina.

## Ease of Use

A machine equipped with different ergonomic solutions, like the option of a **removable drainage** tank easy to clean.

Thanks to the **Up&Down** system, one can use different cup sizes and recreate different recipes like espresso or americano in a tall cup.

With Faemina even a coffee-shop grade cappuccino is possible, thanks to the **Autosteam** wand that perfectly foams the milk automatically. An ideal feature not only for coffee experts but also for those who have just recently taken an interest in the coffee trends.

## Be Faema App

Thanks to the "Be Faema" App, the coffee community is brought together. Interacting with the machine is now simple and easy, for a coffee experience at 360 degrees thanks to the App's Voice Recognition feature. Allowing its users, from coffee experts to new coffee lovers, to discover all the new features their professional coffee machine-at-home has to offer.
