LUX ITALIA - ILLUMINIAMO I TUOI PENSIERI

Lux Italia è eccellenza italiana nello sviluppo di sistemi d'illuminazione ed elettronica di controllo al servizio dell'architettura e alla diffusione della cultura della luce, attraverso un nuovo approccio che parte dall'innovazione tecnologica e non dal prodotto.

A Cambiago, nel cuore pulsante della manifattura lombarda, è la sede dell'azienda che ad oggi è punto di riferimento nel settore illuminotecnico, un player capace di operare in 40 Paesi in tutto il Mondo con soluzioni progettate e installate in tre continenti. A livello mondiale è riconosciuta tra i leader per sistemi di regolazione automatica LED nonché il principale fornitore di sistemi d'illuminazione nel settore bancario italiano.

Lux Italia è da sempre azienda virtuosa che si prende cura del benessere del pianeta dando vita a progetti innovativi e sostenibili. La definizione e la cura dell'ambiente sono fattori che in maniera prioritaria influiscono sulla definizione dell'architettura delle installazioni che l'azienda sviluppa.

I metodi progettuali e produttivi portano ad un considerevole risparmio delle materie prime con la conseguente riduzione dell'impatto ambientale. Queste metodologie sono state riconosciute dalla 14001:2015 e dalla 14021:2020, e diventano per i clienti garanzia di qualità, professionalità, velocità ed affidabilità.

Le competenze nello sviluppo di hardware e software rendendo Lux Italia tra le più competitive del mercato mondiale, sia in termini economici che di qualità del prodotto. L'obiettivo non è produrre e commercializzare prodotti di illuminazione, ma sviluppare soluzioni innovative per l'illuminazione.

L'azienda muove i primi passi nella seconda metà degli anni '80 specializzandosi nella progettazione elettronica, facente supporto tecnico per i maggiori produttori mondiali di microprocessori. Un percorso che porta alla nascita ufficiale di Lux Italia nel 2004 e che, nel giro di pochissimi anni si posiziona sul mercato interno come principale produttore e fornitore italiano di sistemi di controllo dell'illuminazione a LED. Nel 2013 diventa membro dell'ANSI (American National Standard Institute).

Oggi Lux Italia è uno dei primissimi produttori di sistemi con tecnologia a LED, valido alleato della creatività, dell'ambiente e delle emozioni che le fonti di luce donano ai contesti in cui vengono impiegate.

LUX ITALIA - WE LIGHT UP YOUR THOUGHTS

Lux Italia is Italian excellence in lighting systems and control electronics development at the service of architecture and the diffusion of the light culture, through a new approach that starts from technological innovation and not from the product.

With the headquarters in Cambiago, in the heart of Lombard manufacturing, is operating the company that is a reference manufacturer in the illumination sector, a player capable operating in 40 countries worldwide with applications installed on three continents. Moreover, Lux Italia is one of the leaders in LED automatic management systems as well as the main supplier of lighting systems of the Italian banks.

Lux Italia has always been extremely careful about Earth well-being by designing through an innovative and sustainable project. The definition and care of the environment are factors that primarily influence the definition of the architecture of the installations that the company develops.

The design and production methods lead to a considerable saving of the raw materials and energy with the consequent the environmental impact reduction. These methods have been recognized by ISO 9001:2015, ISO 14001: 2015 and ISO 14021: 2020, and become for customers a guarantee of quality, professionalism and reliability.

The skills in hardware and software development makes Lux Italia among the most competitive world manufacturers, either in economic terms and in product quality. Our goal is not to produce and supply illumination products, but to develop innovative lighting solutions.

The company took its first steps in the second half of the 1980s, specializing in electronic design, providing technical support for the major world manufacturers of microprocessors. This led to the official foundation of Lux Italia in 2004 that, within a few years, positioned Company on the domestic market as the main Italian manufacturer and supplier of LED lighting control systems. In 2013 Lux Italia became a member of ANSI (American National Standard Institute).

Today Lux Italia is one of the very first manufacturers of automatic LED illumination management systems, a valid partner in creativity, the environment protection and the emotions-builder through a cutting-edge light source.

AWARDS

AWARDS

AWARDS | 2009 | INTESA SAN PAOLO BANK - MILAN, ITALY

World first ever bank office entirely illuminated with fully automatic LED "Best Technological Eco Friendly Innovation" from Legambiente, Italy

AWARDS | 2011 | TOLEDO UNDERGROUND STATION - NAPLES, ITALY

"The most impressive European underground station" from London Daily Telegraph and The Guardian, UK

AWARDS | 2013 | TOLEDO UNDERGROUND STATION - NAPLES, ITALY

"The World most beautiful underground station" from CNN, USA

AWARDS | 2014 | TOLEDO UNDERGROUND STATION - NAPLES, ITALY

"The Oscars of Tunnelling - a masterpiece of engineering and architecture" from International Tunnelling Association, Switzerland

TECHNOLOGY

Professional, award winning light design services and in-house development of new LUX Italia products. Advance Research and Development Technical Department and laboratories for Mechanical, Thermal, Optics, Electronic and Software design.

Indoor and outdoor architectural design with our valued Partners. Artistic design of Exclusive limited series of luminaries.

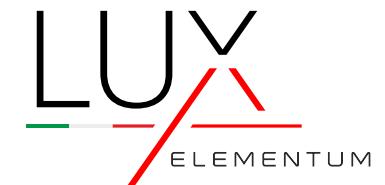

Limited production of hand-made Exclusive luminaries

High volume production of Professional Technical and Architectural illumination products

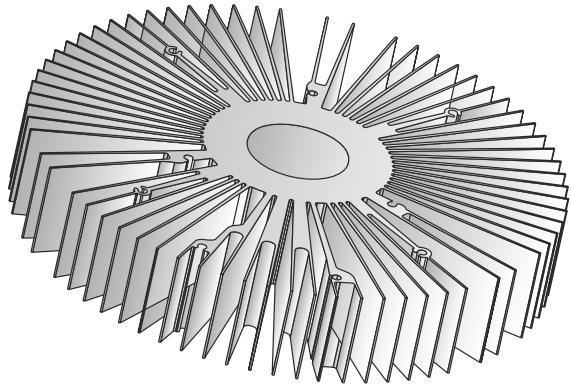

Tailor-made hand-craft unique luminaries

Entry level light equipment for high volume applications with mid-term lifetime

FOR ANY NEED A DEDICATED DIVISION TO OFFER UNIQUE SOLUTIONS

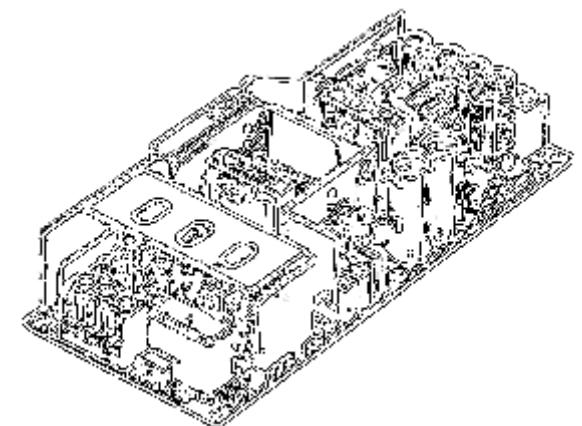

CUTTING-EDGE TECHNOLOGY

High efficiency thermal solutions for long life
LED duration

UNCOMPROMISING LIGHT QUALITY

Luminaries with **CRI98** and Dynamic White

ABSOLUTE PERFORMANCE

High efficiency Resonant switching
LED drivers

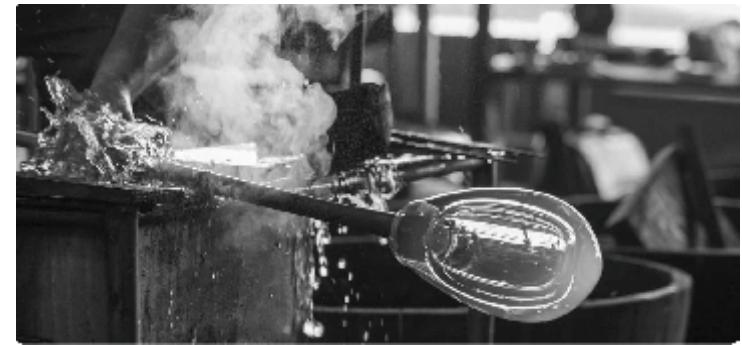

TECHNOLOGY

EXCLUSIVE MATERIALS

Aluminum, Stainless Steel, Carbon, Copper, Titanium are used to build our luminaries

HAND-CRAFTED BY ITALIAN ARTISANS

Manufactured with tradition inherited from generations
