# OUR PEOPLE make the difference

Tecnografica has 100 employees, and half of them are designers. It goes without saying that thanks to this we are able to design large volumes, in order to react quickly and flexibly to the requests we receive. Service and good design have top priority for us. Our strength is being able to provide our customers with a 360 ° service as quickly as possible.

Thanks to our high performance scanners and cameras, we are able to get the optimal starting point for developing the design in the best conditions, which is a fundamental requirement for getting high quality printing.

With almost 30 years experience, Tecnografica is the ideal partner for design studios and architects, with the constant ambition of offering new design solutions.

With the “Italian Wallcoverings” brand, Tecnografica specialized in the digital printing production of high-quality wallpaper, as well as in the production of large-format panels. Some references are available on our homepage

# THE COMPANY

**S**ince 1992, the Italian company's mission is to offer its customers the best in terms of design and technology. Since always our philosophy has been characterized by our capability to go beyond and to look forward, by our willingness to create new aesthetic solutions, leading us in the realization of stunning designs industrially reproducible. We have never come along with easy ways. Sometimes we chased after unrealistic dreams at the edge of an eternal challenge between fantasy and reality. Willingness and passion drove and supported us in settling goals and exploiting them for our future amazing projects. World leader in the ceramic industry design sector, Tecnografica draws from his experience and graphic expertise to create the Tecnografica Italian Wallcoverings brand, which designs and produces the Wallpaper and Wallcovering lines.

WALLPAPERS

DECORATIVE PANELS

# WALLPAPERS

TecnoGrafica design: the perfect wallpaper for any style

The wallpaper by TecnoGrafica Italian Wallcoverings comes from **high-end craftsmanship, modern technology and Italian design.**

Furthermore, it is an ecological wallpaper made with completely ecological materials and conceived to be in perfect harmony with all the environments and pieces of furniture. Our wallpapers are inspired by different atmospheres and subjects, in order to create a **spectacular, creative, and highly artistic effect for any kind of interiors.**

# HIGH-END CRAFTSMANSHIP, MODERN TECHNOLOGY AND ITALIAN DESIGN

# WALLPAPER FINISHES

## **Fabric**

The Wallpaper Fabric by Tecnografica is a technical wallpaper, with a structured fabric effect surface, that allows the reproduction of bright colors and very fine detailed texture design, also thanks SD technology used for the graphic realization and the high resolution of the digital printing.

## **TNT**

The Wallpaper TNT by Tecnografica is a technical wallpaper, with a structured spatulate effect, that allows the reproduction of bright colors and very fine detailed texture design, also thanks SD technology used for the graphic realization and the high resolution of the digital printing.

## **Skin**

The Wallpaper Skin by Tecnografica is a technical wallpaper, with a smooth surface, that allows the reproduction of bright colors and very fine detailed texture design, also thanks SD technology used for the graphic realization and the high resolution of the digital printing.

## **Natural**

Cellulose fiber-based, PVC-free and without chemical solvents, provided with all certifications required for application in private and public locations. The support is white, embossed and thick, with stucco effect. Moreover, this support guarantees photographic-quality images, with extremely bright and vivid colours.

## **H2O**

Tecnografica's H2O Wallpaper is a special wallpaper made of fiberglass enabling the decoration of the most humid environments including the bathroom and the internal part of the showers. The exclusive SD technology used for the graphic realization and the high resolution of the digital printing perform a wide chromatic range of color with stunning decorative effects.

## **Soundproof**

Only few millimeters thick and digital-printed in high resolution. As a result of an accurate study on materials, Soundproof is an innovative support that can be applied both to walls and ceilings. Its particular structure obstructs the passage of sound waves and allows:

- the absorption of noises and sounds, which are softened both from the outside towards the inside of the environment and viceversa;
- the decrease of the echo and reverberation effects into the room, making it easier to concentrate for the people who are working or studying inside;
- the acoustic isolation even in environments that are characterized by lack of space, as an efficient and thin support.

Therefore, Soundproof can be successfully applied not only in offices and private houses, but also in public environments, such as bars, restaurants, hospitals, medical clinics, halls, waiting rooms, and in every space where the noise absorption is felt as necessary.

PANELS

Decorative panels: solutions for panels and wall murals

The decorative wall panels by TecnoGrafica Italian Wallcoverings represent an innovative reality in the world of wall murals.

The system used is composed of **large-format panels (up to 150x300 cm) with a very reduced thickness**, in order to obtain a high quality thin wall paneling. The state-of-the-art detection and printing technology, derived from the parent company TecnoGrafica, allows to have a **perfect quality and super-defined images**, as regards both visual impact (wall planks textures and stone effect panels, such as marble, agate, onyx and many others) and supports (light panels for walls, backlit panels, matt, glossy and more).

On the basis of the various kinds of finishes, our decorative wall panels are available in five different supports: Dècora Resin, Dècora Lux, Dècora Stucco, Smart Panel, and Dècora LED. The flexibility of our offer also comes from the size of the decorative wall panels, that can be totally customized, following the specific characteristics of your own project.

# DECORATIVE PANELS FINISHES

## **Dècora LED**

Dècora LED is the Light-integrated Decorative Panel System that combines decoration with LED technology, creating unseen spectacular effects through plays of light and color variations. The reduced thickness of the panel allows installation on wall, recessed-panel installation, and even installation on specific profiles, standing far from the wall. Totally programmable and manageable through a controller or a mobile app, Dècora LED boasts an excellent light and color rendering, together with a low energy consumption. The shape of Dècora LED support can be customized thanks to the absence of lateral frames. Moreover, the uniform lighting from the center to the edges creates continuity among panels and gives aesthetic completeness to the graphic. The Patent registered for this lighting technology further highlights its cutting-edge and innovative nature.

## **Dècora Lux**

Backlightable, the Dècora Lux slabs play with the transparency of the resin and the opalescence of the PMMA (polymethylmethacrylate) support to realize coverings, decorations and evocative enlightenments. The slabs reach a thickness of 10 mm.

## **Dècora Resin**

Created on a rigid compound aluminum support, Dècora Resin takes advantage of his high technical value that, with the versatility of the resin, breathes life into a product with high aesthetic and functional qualities. The slabs reach a thickness of 6 mm.

## **Dècora Stucco**

On a rigid compound aluminum support the slabs Dècora Stucco are worked and finished completely by hand. Strong points: the numerous available graphics, the productive technology, the craftsmanship and the very easy laying. The slabs reach a thickness of 5 mm.

## **Smart Panel**

Smart Panel is the innovative and high-level technology support for decorative panels. Smart Panel combines the lightness of Forex with the strength and shininess of transparent Polycarbonate. Thanks to the total customization of graphics and dimensions, this support is suitable both for small realizations and big projects, since it guarantees a stunning visual effect through brilliant colours and high-definition images. Smart Panel slabs come with a final thickness of 6 mm.

## **Smart Panel Double Face**

Smart Panel Double Face is the bifacial version of Smart Panel. Like the original one, this slab combines the lightness of PVC with the strength and shininess of transparent Polycarbonate. The double graphic makes this panel particularly suitable for sophisticated partitions or perfect as a decorative element in stylish environments. This product comes complete with edging on the profile, in order to create a more elegant result. Smart Panel Double Face reaches a final thickness of 9 mm.
