

Company profile

Milan 2024

Founded in 1977 in **Umbria**, a region where it still maintains its headquarters, CIAM has, within just a few years, become a **leading player** in the **refrigeration** and **professional furnishing** sectors.

By combining cutting-edge design and technology, it is now one of the global reference companies in the **HO.RE.CA.** sector, thanks to its approach that interconnects **design, sustainability, and innovation.**

The company stands out in the **contract** world due to its ability to manage complex and fully customizable projects, supported by a variety of collections designed to meet diverse needs. This makes CIAM a high-level player, recognized not only for the **quality** of its products but also for their **aesthetic appeal.**

CIAM's sense of innovation begins with finding a new way to think about **production.** Instead of a linear model, closed in on itself and focused on seriality, the company adopts a model inspired by nature: an archipelago of production, where each “island” enhances its own uniqueness while remaining open to endless possibilities for **creative thinking.** In this way, **innovative technologies** blend with the artistry of **craftsmanship, design culture,** and a passion for beauty—a combination that creates unique products with a soul.

With approximately 200 projects developed worldwide each month, CIAM also offers, in addition to its 23,000 sq m **production center** in Pertignano d’Assisi, a **lounge** where clients can begin to explore the brand and its core values, as well as a dedicated space in Milan. The latter is a **showroom** developed by Fabrizio Milesi as a true laboratory for **tailor-made** solutions. Every detail is designed to bring out the essence of the company, from its historical roots to its most recent and sophisticated professional refrigeration technologies, establishing CIAM as a **global reference** in its field.
