

Hygge Flames, State-of-the-art virtual fireplace adapted to our new way of living

Innovative Company Hygge Flames has reimagined the fireplace. Based in Belgium, Hygge Flames has succeeded in combining the latest technology with care for the environment, safety and aesthetics in one great, innovative, holographic 3-D fireplace.

Nadine De Smecht, CEO says: “Hygge Flames is the result of our most ambitious project yet, to create the perfect contemporary fireplace. To bring Hygge Flames into your life is to immerse yourself in simplicity and comfort. The comfort of effortless beauty, of uncompromising safety, of knowing you are being kind to the environment.”

The mirror helps to create the Holo Flames and is fully retractable. This is **unique** and leaves only the logset visible when Hygge Flames is turned-off. No disturbing reflection of interior elements and glass. The fireplace in its purest form!

Simple and compact, electricity is all you need to create your own atmosphere with peace of mind that you are also being kind to the planet.

No wood, no gas, zero emissions. There is no need for a chimney, air inlet, gas or water line, fireproof materials. It is easy to install - and does not require specialist installation.

Simple and compact, Hygge Flames can easily be integrated into any space: private houses, apartments, offices, lobbies, hotel rooms, restaurants, cafés, public spaces, shops, clubs ... even in a pool house or yacht.

Moreover, this fireplace is absolutely safe. There is no heat, no fire hazard, no hot embers, no risk of CO poisoning. Children and pets can play in absolute safety and there is no danger to customers in commercial or public spaces.

Intelligently designed to save space, it can easily be installed in any room. There are no technical limitations. Hygge Flames can even be built into an existing wood or gas fireplace or inserted into an old open fireplace to bring it back to life.

Hygge Flames products can be personalised by selecting from a range of standard or custom-made designs, each crafted from high quality materials including blue laminated, black, rusted or powder coated steel; or fully customise your own unique design.

As the centrepiece of any space, anywhere, Hygge Flames truly provides the Scandinavian ‘hygge’ atmosphere.
