# sp.a\_consulting

Realizing a Spa is a fascinating experience that requires know-how, as well as careful and precise planning to achieve the best results. At Starpool, we believe that the best strategy to undertake this creative path is to establish a team of professionals who can work in synergy to fulfil the best possible project. A combination of competences, good taste and management skills to make the difference, indeed. **Efficient design contributes to efficient management.**

A 40-year-long experience, **more than 3.000 projects implemented in Europe and worldwide**, historical, cultural but also medical and scientific knowledge in the fields of thermal treatments and sports, blended with passion and curiosity. These are the ingredients that Starpool offers its clients in order to identify the most adequate solution on a case-by-case basis with a view to satisfying each and every request.

Engineering of Spas, swimming pools, custom products, as well as mechanical and electric systems, feasibility studies and sustainability analysis with consequent business plan development, training and start-up are some of the services Starpool makes available to clients.

sp.a\_system

How often have you been to a Spa and felt lost among steam baths, showers and tables?  
 How often have you felt weary and overrelaxed after taking a sauna?

sp.a\_system®

The incorrect use of wellness equipment can sometimes cause inappropriate sensations.

When exposed to high temperatures, our body experiences a sort of false fever that activates our immune system. Diving into snow or plunging in cold water is a fundamental practice to restore our temperature to normal standards and feel good again.

Thanks to specifically designed signage and supports, Starpool **sp.a\_system** paths, help the user be informed about the times and conditions of use of each environment.

“We have identified the main wellness ambitions of Spa users and have combined them with scientific parameters.”

A team of **spa physicians** have studied the right sequence to use the appliances and the correct time to be spent in each appliance for every ambition. Dr. Alessandro Corsini has conducted an independent scientific study and has then published important reports on his method in the international magazine “Sport Sciences for Health”.

The purpose of this research was to prove how the sensation of wellness perceived by people exposed to an adequate amount of heat, cold and rest can reflect a real physical state of relaxation.

After completing their Spa path, the individuals involved reported an increased modulation of the heart rate as a result of the activation of the vagal system which our body activates more frequently when relaxed.

## 4 BRACELETS FOR 4 WELLNESS GOALS

Choose your path, put on the bracelet of the corresponding colour and follow the guidelines.

### / RELAX

To relax your body and mind, to lower the levels of stress, to favour the sleep thanks to a gradual lowering of your body temperature.

58%\*

### / TONIC

To tone up thanks to sweating and pore dilatation while detoxifying and compacting your tissues.

4%\*

### / PURIFY

To purify your body through intense sweating that oxygenates and detoxifies your skin.

21%\*

### / EXCITE

To newly boost energy and to tone up the heart rate thanks to a sequence of heat and intense cold.

11%\*

\*These percentages refer to a market survey based on the wishes and needs of Spas clients.

# Made in Italy

Starpool products are based on **research and development, patents and design.**

Human value and taylor soul in a production chain organized according to the industrial model like Starpool's: these are cornerstones both in the production processes and in the preceding design phase.

Thanks to a team of engineers, industrial designers, programmers and the cooperation of physicians with different specializations, our **Research & Development unit** - the company's beating heart - conceives and develops the best solutions to ensure high standards of quality, hygiene, innovative technologies and methods of use of any Starpool appliance.

The outcomes of our Research & Development unit include all our **patents** and the numerous registrations of industrial **design**, which highlight our ability to innovate.

All the models of saunas, steam and heat baths in the Starpool collections are finished and internally covered with maximum care to hygiene - the use of top technologies enables us to guarantee energy saving and remote control of the appliances.

Along with the possible customization of every product, Starpool range of products offers over **20,000 possible configurations** for steam baths, saunas and heat baths, in addition to relax beds, showers, cold baths, pools, dry floatation products and furniture for Spas.

**"We study, design and build all Starpool products in our factories in Ziano di Fiemme, our proud expression of Made in Italy"**

# GREEN TECHNOLOGY

We do believe in the added value of **environmental-friendliness**. For this reason, our products offer solutions to reduce energy consumption and to improve and automate their functions. The green nature of Starpool products is a **priority** in all collections.

## GREEN PACK

A software and a hardware to adjust the temperature and **keep it** regular. The Green Pack is connected to the **self-closing doors**: it contributes to save up to **20% energy** in standard operating mode by managing the energy load.

## TOUCH DISPLAY

A software for the **remote management** of all Starpool products. It sends a lot of functional information, alerts and check- ups to **any mobile device**.

## ECO SPA TECHNOLOGY

A user-friendly software for the management and the automatized control of all Starpool devices installed in a Spa. Designed for **remote diagnostics** and the **optimization of the energy loads**. When controlling power distribution, it is possible to avoid the **overrun of the set kW** to make the appliance work properly, for long-term saving.

CONTROL YOUR **SMART SPA** THROUGH VOICE CONTROLS

...switch my sauna on!

The use of devices like Google Home, Google Assistant and Alexa helps switch on/off all products in the Spa and control all their functions through voice control.

The opportunity to speak to your Google Assistant or Amazon Alexa will enable you to not miss a minute of your wellness time.

# SoulCollection

*Saunas and steam baths with an extremely **essential design** and pure lines, but, what is more important, immediate and easy to use.*

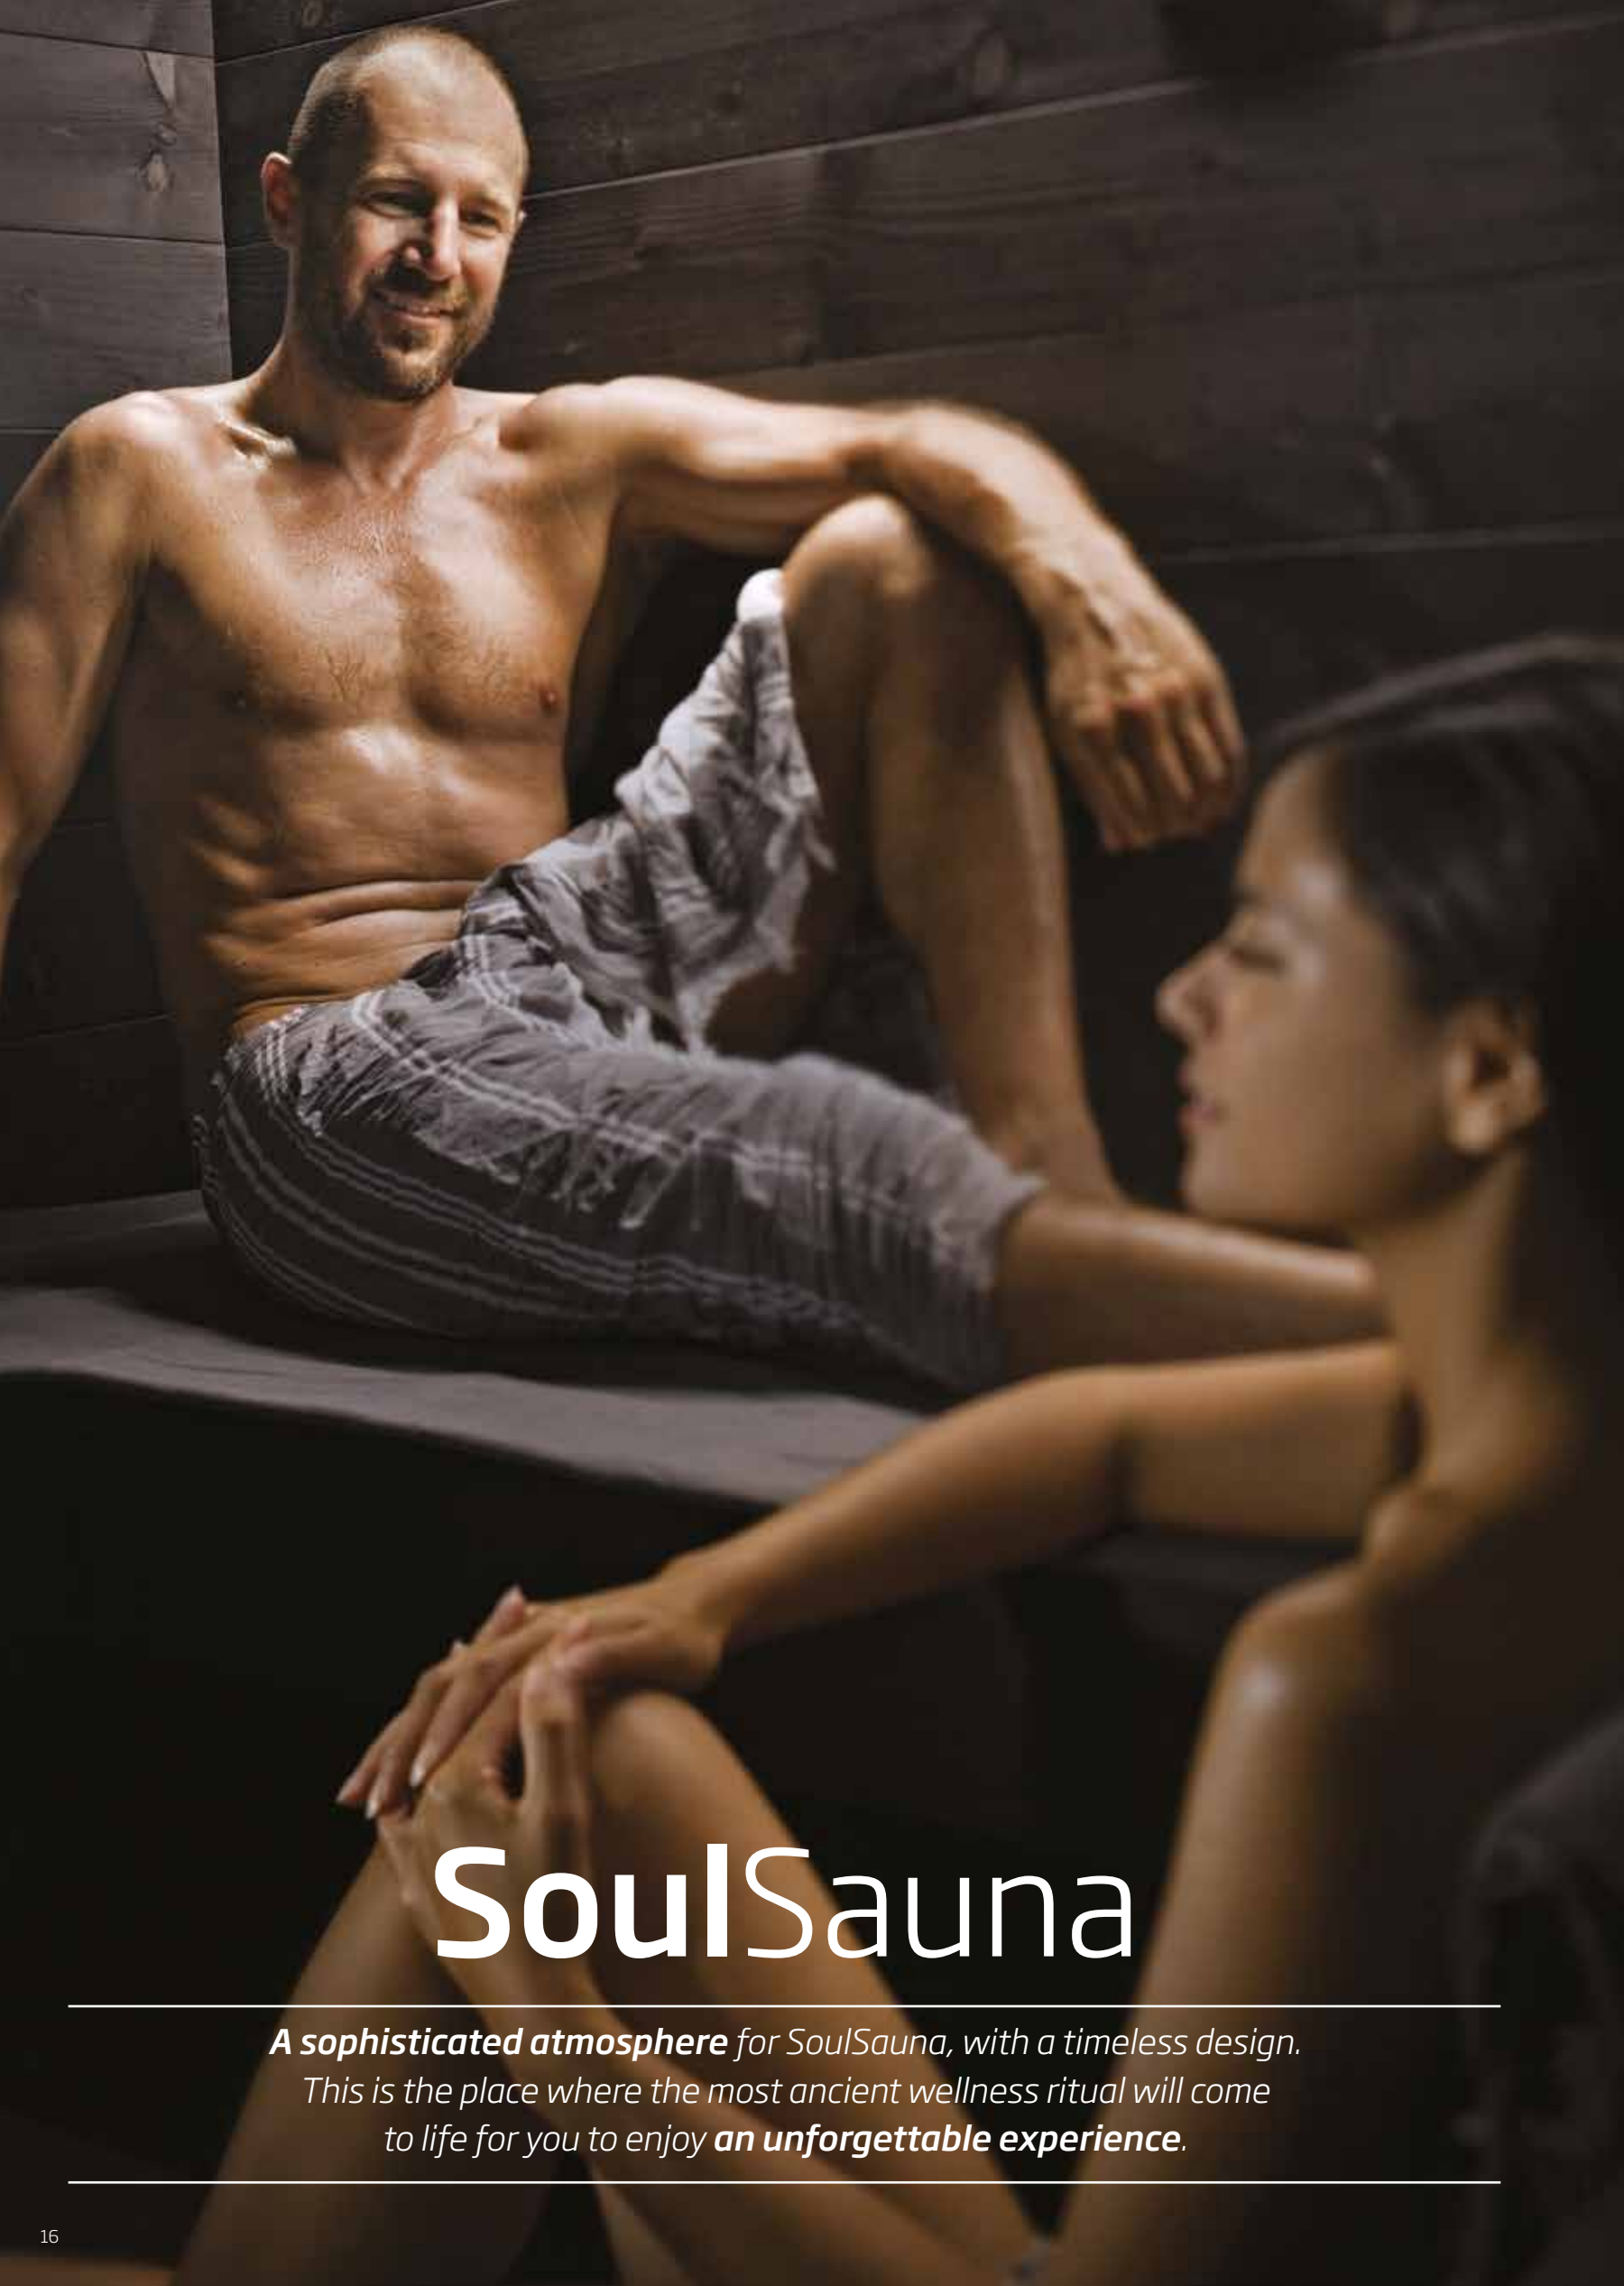

A range of products that reflect **the know-how of Starpool's professional world in a smart version.**

Objects with a clearly contemporary and urban design that modernize the most ancient wellness rituals.

Products from the **SoulCollection** fulfil the wishes, timing and manners of users willing to live their wellness time **with the support of technology**: an intuitive software to switch your appliance on/off via **tablet, smartphone or touch screen** and to select your favourite music.

# SoulSauna

*A sophisticated atmosphere for SoulSauna, with a timeless design. This is the place where the most ancient wellness ritual will come to life for you to enjoy **an unforgettable experience.***

A nordic atmosphere for SoulSauna which draws from the typical **typical Finnish Savusauna**, where the seating and walls were fouled with soot due to no chimney being installed.

The pale charcoal grey and dark brown effect is given by a special treatment with natural wax to guarantee **the highest level of healthiness.**

The Nordic tradition meets the tradition of Val di Fiemme. SoulSauna can be coated with the prestigious local spruce, which was the tree Stradivari used to build his violins.

**“An indirect light fall illuminates the interiors with natural light and sublimates the purity of wood for an overwhelming effect.”**

## Data Sheet

<b>Technical Specification</b>	Finnish Sauna
<b>Temperature</b>	90 - 100°C
<b>Relative Humidity</b>	10 - 20%
<b>Heating</b>	Electric stove
<b>Voltage</b>	230 VAC 1P+N+PE / 400 VAC 3P+N+PE
<b>Max Consumption in kW</b>	4,5 / 9,5

walls and seating in Val di Fiemme spruce

**FAIR SOUL**  
walls and seating in natural hemlock

# SoulSteam

Wrapped in a cloud to live the quintessence of well-being in an **intimate and private dimension.**

In SoulSteam wellness is shaped in its pure and austere lines, but especially in the perfect mix of steam and water.

**Steam bath, shower and water blades** merge to give life to a **multi-functional product.**

“Simplicity and usability:  
comfort converted into  
user- friendly technology”

## Data Sheet

<b>Technical Specification</b>	Steam Bath
<b>Temperature</b>	43 - 45°C
<b>Relative Humidity</b>	98%
<b>Heating</b>	Direct steam introduction
<b>Voltage</b>	230 VAC 1P+N+PE / 400 VAC 3P+N+PE
<b>Max Consumption in kW</b>	3,5 / 12,5

**FULL SOUL**  
walls and seating in anthracite grey glazed stoneware

**PURE SOUL**  
walls and seating in ivory white glazed stoneware

# COLOURS OF SOUL

## THE NEW SOUL OF WELLNESS

**SoulSauna** and **SoulSteam** are dressed in **five chromatic proposals** with an emotional personality.

An original palette opens up the doors to total customization and gives new prestige to the most authentic wellness products.

“Colour becomes a perfect tailor-made dress for new refined saunas and steam baths”

The sauna and steam bath as pieces of furnishing and design that perfectly suit the wellness environments and take shape in new interior settings. Not only a revolution of colours, but also the total-black look of Starpool taps and fittings in addition to steam bath accessories.

“Elegant, captivating and dusty shades connected to particular states of mind that create an emotional range of colours available for your spa”

### Colour SoulSauna

-  **DEEP SOUL**  
walls in satin-effect green crystal
-  **LIGHT SOUL**  
walls in satin-effect light blue crystal
-  **INTENSE SOUL**  
walls in satin-effect plum crystal

A collection inspired to allure, elegance, sensuality and seduction. Products from the Glamour range are precious jewels made by Italian craftsmanship, filled with memories reinterpreted in contemporary style. Our GlamourCollection is by award-winning designer Cristiano Mino.

### Glamour

*It satisfies your need of getting surrounded by objects that can voice your personality with a strong and charming style. Glamour evokes the social tradition and memories and it renovates and interprets it both in an aesthetical and technological way.*

A collection and a line of products with an unconventional design for our saunas and steam baths. Polished aluminium giving a sophisticated effect, the optical effect of details in a perfect Sixties mood, the red cedar or the black pine - everything is well finished, even the most hidden detail, designer Cristiano Mino explained. The concern for the invisible distinguishes real craftsmanship and top quality.

# GlamourCollection

**We believe in Design and Beauty.**

*The beauty of details that communicates through gestures, the forms of language, matter and image.*

*To broaden the creativity and share the knowledge means to bring innovation.*

**“Everything is well finished, even the most hidden detail”**

# GlamourSaunaPro

*A journey back to the past, in the heart of the fascinating Scandinavian culture.  
A one-thousand-year leap back in a cold country, thriving with lakes and forests.*

In **GlamourSaunaPro** expert hands combine refined and genuine raw materials with well engineered environments. The different claddings offer surprising colour effects, but also intriguing properties.

From **Canadian red cedar**, with its disinfectant, antibacterial and hypoallergenic features, to **black fir**, in memory of the environment the Finns loved the most: the "SavuSauna" or "SmokeSauna".

**Custom-tailoring** is evident in the placement of the boards that regularly alternate different but identical heights at the points of intersection with the seating. A stylistic choice made to prevent visual spoilage of the geometry of a perfect drawing.

"The purity of wood  
for a enchanting effect"

## Data Sheet

<b>Technical Specification</b>	Finnish Sauna / Soft Sauna
<b>Temperature</b>	90 - 100°C Finnish Sauna / 50 - 60°C Soft Sauna
<b>Relative Humidity</b>	10 - 20% Finnish Sauna / 40 - 60% Soft Sauna
<b>Heating</b>	Electric stove

 **LINDEN**  
walls and seating in linden wood

# GlamourSteamPro

A tribute to the ancient places dedicated to personal wellness: *inspired by the Arab hammams*, where the steam bath rituals are revived in the name of charm and elegance.

*"A tribute to ancient places of wellness"*

**Back to the past** with an involving mix of sinuous and soft lines.

The gold and the silver hone the functional elements like the steam inlet source and the wall columns. Anodized aluminium forges these jewels in a unique mould and the result expresses power and personality.

**Soft and natural lights** conceal the interior environment. It is like being on the doorway of a secret world. The lantern ceilings with the set spotlights remind of the natural slivers of light of ancient hammams.

The different **types of cladding** available range between bright ecostone to crystal with its magical three-dimensional glares. The fluted crystal effect recalls the classic mosaic (Roman opus) without the presence of grouted surfaces.

## Data Sheet

<b>Technical Specification</b>	Steam Bath
<b>Temperature</b>	43 - 45°C
<b>Relative Humidity</b>	98%
<b>Heating</b>	Patented AirSteamSystem®
<b>Voltage</b>	400 VAC 3P + N + PE
<b>Max Consumption in kW</b>	6,5 / 18,5

**OPTICAL WHITE**

**OPTICAL BLACK**  
walls in ribbed black crystal

**ECOSTONE WHITE**  
walls and seating in white ecostone

**ECOSTONE BLACK**  
walls and seating in black ecostone

# GlamourMediterraneanPro

Inspired by the Roman laconicum, an alternative to the heat of the Nordic sauna and the humidity of Middle Eastern hammams. This is the Mediterranean Bath® where heat comes from the walls and gives life to **very social moments**.

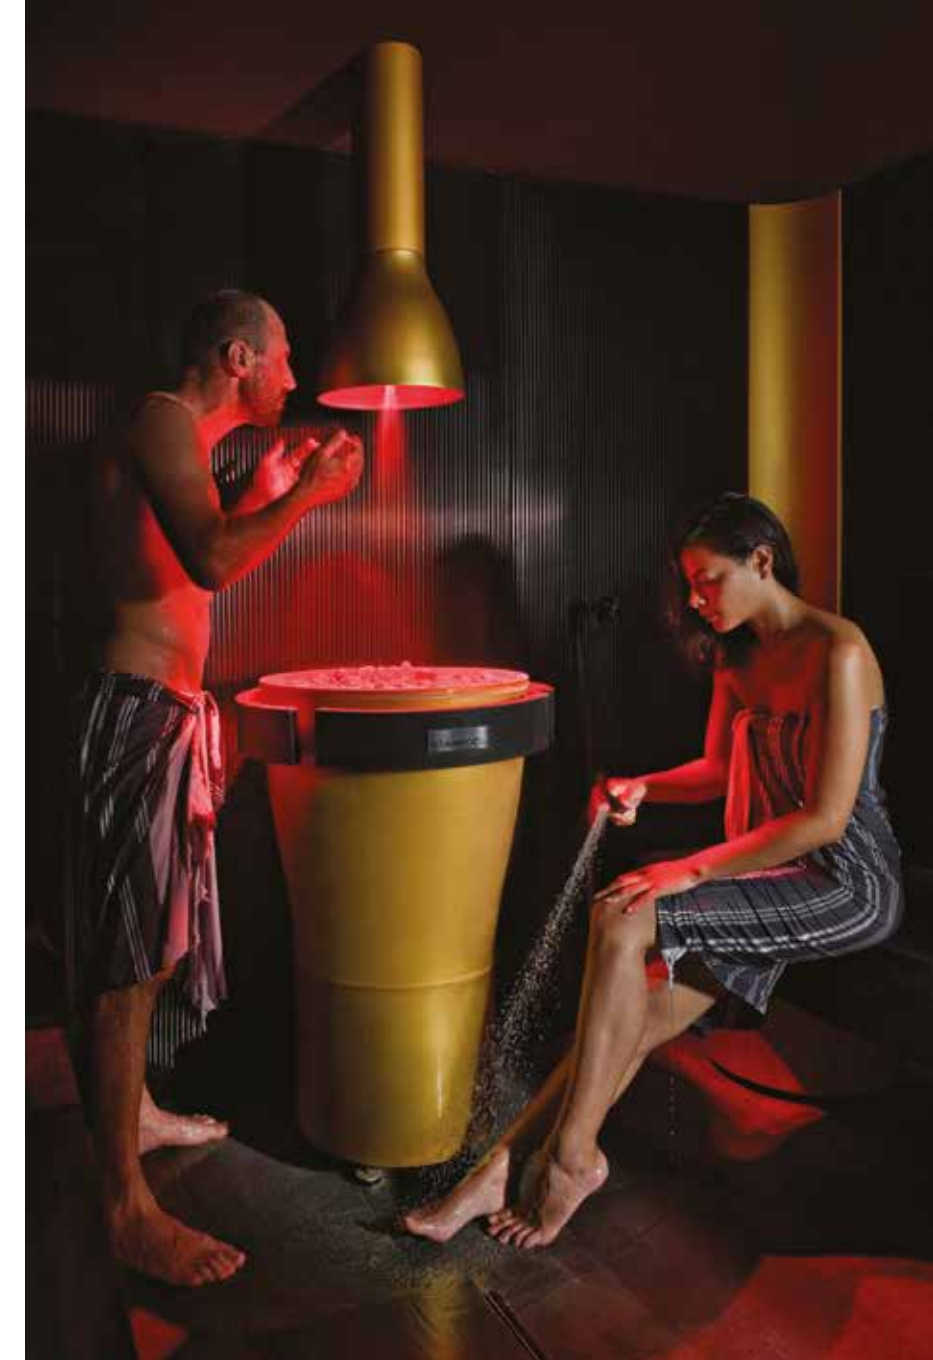

**Starpool patented Mediterranean technology** creates an environment with milder temperatures and a slightly higher humidity rate.

The heat effect stimulates gradual and constant sweating without inducing weariness.

The emotional effect of GlamourMediterraneanPro is generated by a ceiling-mounted nozzle which releases a fragrant flow on the hot stones of the heater at regular intervals.

A red light wraps your body in a warm steam cloud of lavender.

## Data Sheet

<b>Technical Specification</b>	Mediterranean Bath
<b>Temperature</b>	45 - 50°C
<b>Relative Humidity</b>	55 - 65%
<b>Heating</b>	Wall radiation and convection from electrical stove®
<b>Voltage</b>	400 VAC 3P + N + PE
<b>Max Consumption in kW</b>	10 - 12,5

**OPTICAL WHITE**  
walls in ribbed white crystal

**OPTICAL BLACK**  
walls in ribbed black crystal

**ECOSTONE WHITE**  
walls and seating in white ecostone

**ECOSTONE BLACK**  
walls and seating in black ecostone

# GlamourIcePro

*Green light to wellness with a boost of pure energy to re-balance the body temperature after a sauna.*

**GlamourIcePro** is the new Starpool cold line - elements associated to evolved design grouping functionality and beauty in the same environment. The Cool System is designed for cold air distribution in an even manner and to keep the temperature between 5°C and 15°C.

**Glamour IcePro**  
*A chilled environment and finely minced ice to live the most genuine cold reactions.*

## Data Sheet

<b>Technical Specification</b>	Ice Room - Cool System
<b>Temperature</b>	5 - 15°C

# SweetCollection

*A Starpool iconic collection made of elegance and design,  
valuable materials, forms and technology.*

## **Technological innovation and essential lines.**

This is the style we chose  
for a collection of highly functional  
and performing objects.

The flagships of the Sweet product range include:

- > utmost care for details
- > meticulous selection of the materials
- > use of lights
- > cutting-edge technological systems

**Saunas, steam baths, heat baths and showers  
make SweetCollection the top line of Starpool  
where nothing is left to chance.**

# SweetSpa

SweetSpa, **a diamond** shining with its own light, is Starpool most iconic steam bath. A hymn to design and receiver of the "Best of the best" award by Reddot Design Award.

"Natural and highly performing materials capable of giving a sensation of pure comfort with the complicity of water and heat"

A trailblazing **functional design**. With coatings having a grouted surface below 1%, made with priceless marbles or crystals, SweetSpa offers the best hygienic results.

The **solid surface** of the seating is a material composed of natural minerals and a tiny percentage of high-strength resins to make it porefree, antibacterial and long-lasting.

The dispensing system installed under the seating produces a mix of steam and scents that enhances the healthiness of the environment and provides for even steam distribution, without any layering effect. Its **versatility** makes it an extraordinary steam bath. With **SweetSpa**, any ordinary shower becomes a complete mini Spa.

## Data Sheet

<b>Technical Specification</b>	Steam Bath
<b>Temperature</b>	43 - 45°C
<b>Relative Humidity</b>	98%
<b>Heating</b>	Direct steam introduction

 **LUXURY ERAMOSIA**  
walls in Eramosa Marble

# SweetSauna90

Less than 3 sq.m to express **high technology and beauty**.  
SweetSauna90 is the multi-functional sauna to create  
a tailor-made environment dedicated to wellness.

A precise planning analysis **to fine tune the oak to the clean-lined style of an almost minimal design.**

Natural oak wood, with the original saw-cutting or brushed effect, is like a dress of sober elegance for SweetSauna90.

The particular surface working of the boards made of natural oak wood and the building pattern reduce the use of glue during the laying stages - this is what makes SweetSauna90 so healthy.

A complete product with a unique standard composition, ready for installation in already paved locations thanks to the **modular system** which simplifies laying operations.

Another incredible feature is the **low energy consumption** both when the sauna reaches 90° C in 30 minutes and during its use.

## Data Sheet

<b>Technical Specification</b>	Finnish Sauna
<b>Temperature</b>	80 - 90°C
<b>Relative Humidity</b>	10 - 20%
<b>Heating</b>	Electric stove
<b>Voltage</b>	230 VAC 1P + N + PE / 400 VAC 3P + N + PE
<b>Max Consumption in kW</b>	4,5 / 6,5

**CORTINA**  
walls in natural oak slats  
with sawn surface

**MILANO**  
walls in natural brushed oak slats  
and ThermoWood oak

# SweetPro

*Contemporary design and a forceful nature.  
A sauna, a steam bath and a Mediterranean bath: what else?*

**SweetSaunaPro** is a warm and cosy environment, the most evocative wellness place ever, reinterpreted in a contemporary form. The clean lines and its light nature perfectly complete the SweetSaunaPro with other architectural spaces. An attack to the senses. As soon as you step in, the oak and its intense shades give unexpected emotions. The view is satisfied by tones, saw-cutting effect and natural texture of the wood that make the heat bath even more welcoming.

In **SweetSteamPro** which belongs to Starpool professional line and has been conceived in compliance with a criterion of elegance and high performances, aromatized steam blends with the coloured lights to create amazing effects. The technological aspect of this steam bath is another aspect worth considering, characterised by the exclusive AirSteamSystem® that produces a constant blend of air, scents and steam without any layering effect.

With **SweetMediterraneanPro**, the warm bath honours the original purifying rituals with a modern approach - heat is less intense and it is gradually released from the walls. The environment becomes pleasant and airy. This solution is supplied with radiant walls, a constant heat technique, accompanied by the temporized release of lavender-scented water.

## Data Sheet

# ClassicCollection

*Total customization* for this product line that reflects the tradition of wellness, with an approach ranging from alpine to elegant classic style **with contemporary influences.**

A tailor-made range of products with unique lines to emphasize the signature feature of the hosting SPA.

Functionality in these products is based on careful selection of materials and technological research to enhance the aesthetic performance with extraordinarily rich details

Drawing inspiration from Arabian hammams and the ancient Roman thermal baths to revive in modern days the ancient magic of places suited for the most authentic wellness.

The ancient Byzantine tradition of mosaics, the typical local natural stone and the most refined marbles: these are some of **the numberless possible customizations for steam baths from the ClassicCollection.**

Saunas from the ClassicCollection are made with a precious bouquet of natural woods so that each can tell its own story, with calibrated colours and refined texture, which help every sauna perfectly fit in the place where it is installed.

A misty forest scene with tall evergreen trees and sunlight filtering through the fog. The text "Ready?" is overlaid on the left side of the image.

Ready?

Let's take a walk.

# OutdoorCollection

*A product taking its origin from **the forest**, drawing inspiration from the colours of the forest and the twists of the wood grains. An idea taking wellness to the open air with a multitude of forms and dimensions.*

The OutdoorCollection represents Starpool interpretation of the Nordic culture based on the use of outdoor spaces to create places where you can restore and devote to the taking care of your body. A wide range of layouts which, in all their configurations, propose healthy and balanced wellness experiences. Like in a real Spa, the OutdoorCollection will not make you give up the functionality of a well-conceived environment, still respecting the right posology of heat, cold and rest. With the OutdoorCollection, "refreshment" becomes the most authentic experience: a dive into the snow, a plunge in cold water or simply the biting freshness of open-air relax.

Heat. Cold. Rest.

# NatureSauna

Designer firm aledolci&co. is the author of Nature Sauna for Starpool. **This sauna was designed to be in synergy with the environment**, evolving with it as time goes by and giving back to “its residents” a sense of belonging and immersion in the landscape.

**The building, man and nature become one** through the building materials which have been selected to react as one to the context.

The brushed copper used for the protection of wood will oxidize differently according to climate and the wooden coating that is exposed to atmospheric agents will take unique connotations.

Nature Sauna is an oasis where it is possible to feel and to benefit from the regenerating power of natural cycles, all year round and in any climate.

The **wide range of dimensions and layouts**, in combination with **easy installation**, makes this product ideal for every outdoor context, from extreme to domestic contexts.

## Data Sheet

Nature Sauna is proposed in three different dimensions, each including a heated entrance compass, and offering a more compact layout without gallery. The fir structure in the thermo-treated light or dark waxed version grants sustainability and natural harmonic ageing. The brushed-copper surfaces contribute warm and home-like features in addition to providing protection to the most sensitive areas.

# OpenAirSauna

The architectural design by the Florence-based designer firm Cipluelle has succeeded in melting the perfection of the home architectural system in Xlam wood into the neat lines characterising Starpool design.

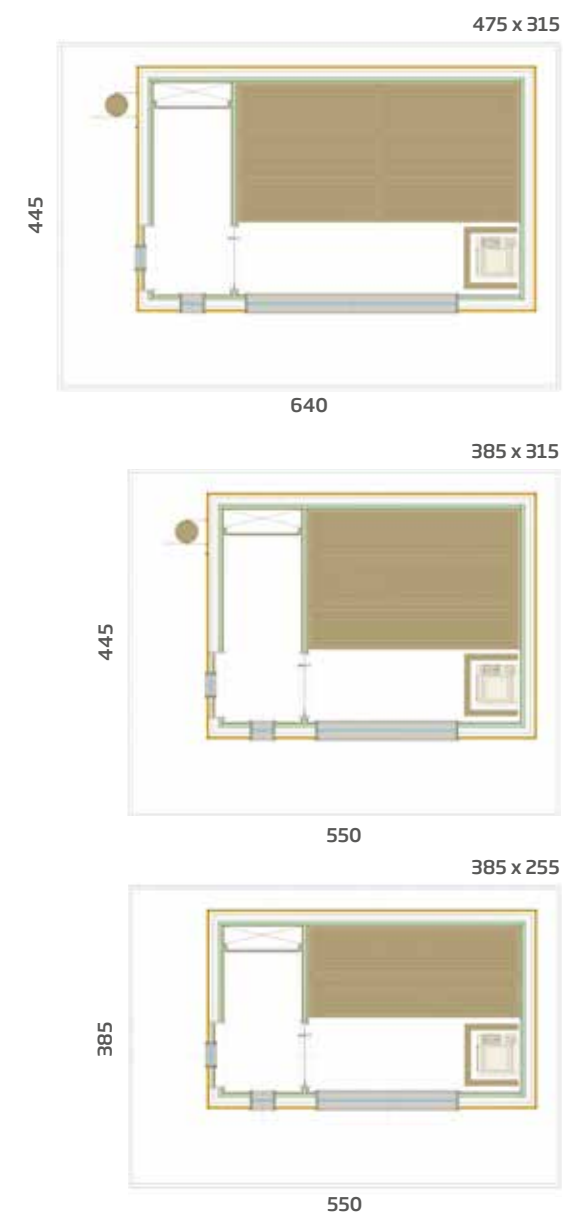

Starpool **modular outdoor** is quick to build and offers an outstanding functionality.

The single block construction, including the floor and walls complete with doors and windows, simplifies the entire building process and reduces the project execution times by up to 80%. The **supporting structure** consists of thick wooden boards, placed orthogonally and assembled in crossed layers.

This is a revolutionary system which speeds up assembly operations on the building site. Furthermore, it is designed and made to save energy. The natural insulating qualities and the low conductivity of wood create a building shell where the heating requirements in winter and the cooling requirements in summer are minimal.

“The use of two different woods to coat the external and the internal walls creates curious contrasts with a pleasant dichromatic effect.”

## Data Sheet

# DryFloatExperience

*Floatation for everyone.*

*An innovative “dry” solution by Starpool for enhanced versatility and effectiveness.*

When dry floating, the body loses all points of contact and its gravity-induced weight, as if it was evenly “suspended”. This helps stretch, relieve and relax the entire musculoskeletal system, which results in improved physiological and blood circulation parameters.

While the body is involved in gravity-free floatation over water at basal body temperature, the mind is relieved from the need to concern about gravity-induced weight, balance, movements, and body temperature regulation.

These are all burdensome tasks that our mind controls in a natural and automatic manner, apparently.

In reality, however, they require a remarkable waste of energy. When the mind gets rid of these “tasks”, it regenerates and all tensions are cleared.

---

## **Regenerate your mind**

Stress and anxiety killer

Positive thinking

Better sleep quality

Focus and concentration

---

## **Regenerate your body**

Muscle and joint pain relief

Spinal tension release

Improved blood circulation

Muscle recovery in sports

# ZEROBODY

## REGENERATE YOUR BODY AND MIND

Zerobody is a unique and patented system designed for gravity-free floatation on top of 400 litres of warm water. It is suitable for everyone, convenient and easy to use. **No need to get undressed or wet:** lay down and let yourself go. It only takes 10 minutes of treatment to feel real benefits. During the session you can listen to music or even experiment Mindfulness paths.

**Patented membrane**  
the body can float without coming into direct contact with water

**Touch screen**  
for session customisation

**Custom wooden base**  
with mirror-effect steel

**Outer custom cladding**  
and a wide range of materials and colours

[zerobody.com](http://zerobody.com)

### Travellers' health

Feeling good is a common need for travellers, whether they are travelling for leisure or business. Zerobody offers travellers an opportunity of deep regeneration for both body and mind. This may come in the form of relaxation during a spa experience and in more innovative forms such as the dry spa or the use of Zerobody in total privacy in their hotel room.

### Wellness at work

The power of floatation - better when combined with Mindfulness paths - has an impact on the three key dimensions of wellness in the work context: the physical, the cognitive and the emotional dimensions. A break for regeneration that is good for the entire company and helps reduce stress-associated costs.

### Muscle strengthening

Floatation helps strengthen the body as it is an important tool for muscular recovery and athletic training in each and every form. It also induces an ideal state of the mind for sport performances, helping concentration and perseverance in achieving goals.

Zerobody has been supporting professional athletes and teams/clubs for years now, helping them to draw daily benefits from the practice of dry floatation.

The physical and psychological benefits of **dry floatation** are now available for the guests of beauty centres, day spas and hotel spas thanks to the innovative concept of **Nuvola Experience**. Especially when used in synergy and combination with the Book of Rituals, which is a truly unique help, the three products making up the Nuvola Experience **maximise the effects of all traditional beauty treatments**, thus supplementing any beauty offer with a tool that contributes to actual regeneration of body and mind.

## Nuvola

Imagine the pleasure of a traditional beauty treatment combined with the regenerating effect of floatation for a long-lasting beauty result and deep well-being.

## Battista

The ideal ally of wellness operators: all tools at hand, possibility to heat or cool the tools to offer the customer the benefits of the ancient wellness formula based on "heat, cold and rest".

## Soffio

Massage table with an innovative water mattress, where a soft wave gently touches the body and maximises the beneficial effects generated by the hands of the operator.
