

FOLDS

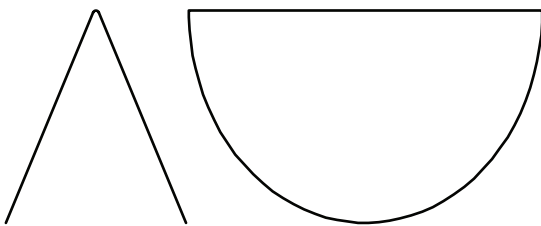

FOLDS

FOLDS was founded with the aim of creating contemporary artefacts that challenge our ways of living. Each individual piece is playful and unique in its use. Its comfort and elegance reason their suitability for any environment.

From basic forms to more sophisticated ones, all united under the same principle — the FOLD. The simplest of all, yet most universal technique in the processing of steel.

Rocking Light

Rockin’ body that swings on touch creates a poetic and dynamic atmosphere surrounding your environment. Made out of aluminium, the Rocking Light incorporates durability with lightness. Available in a wide range of colours and accompanied with a sophisticated LED lighting technology, its characteristics add a warm and self-assured ambience to any interior.

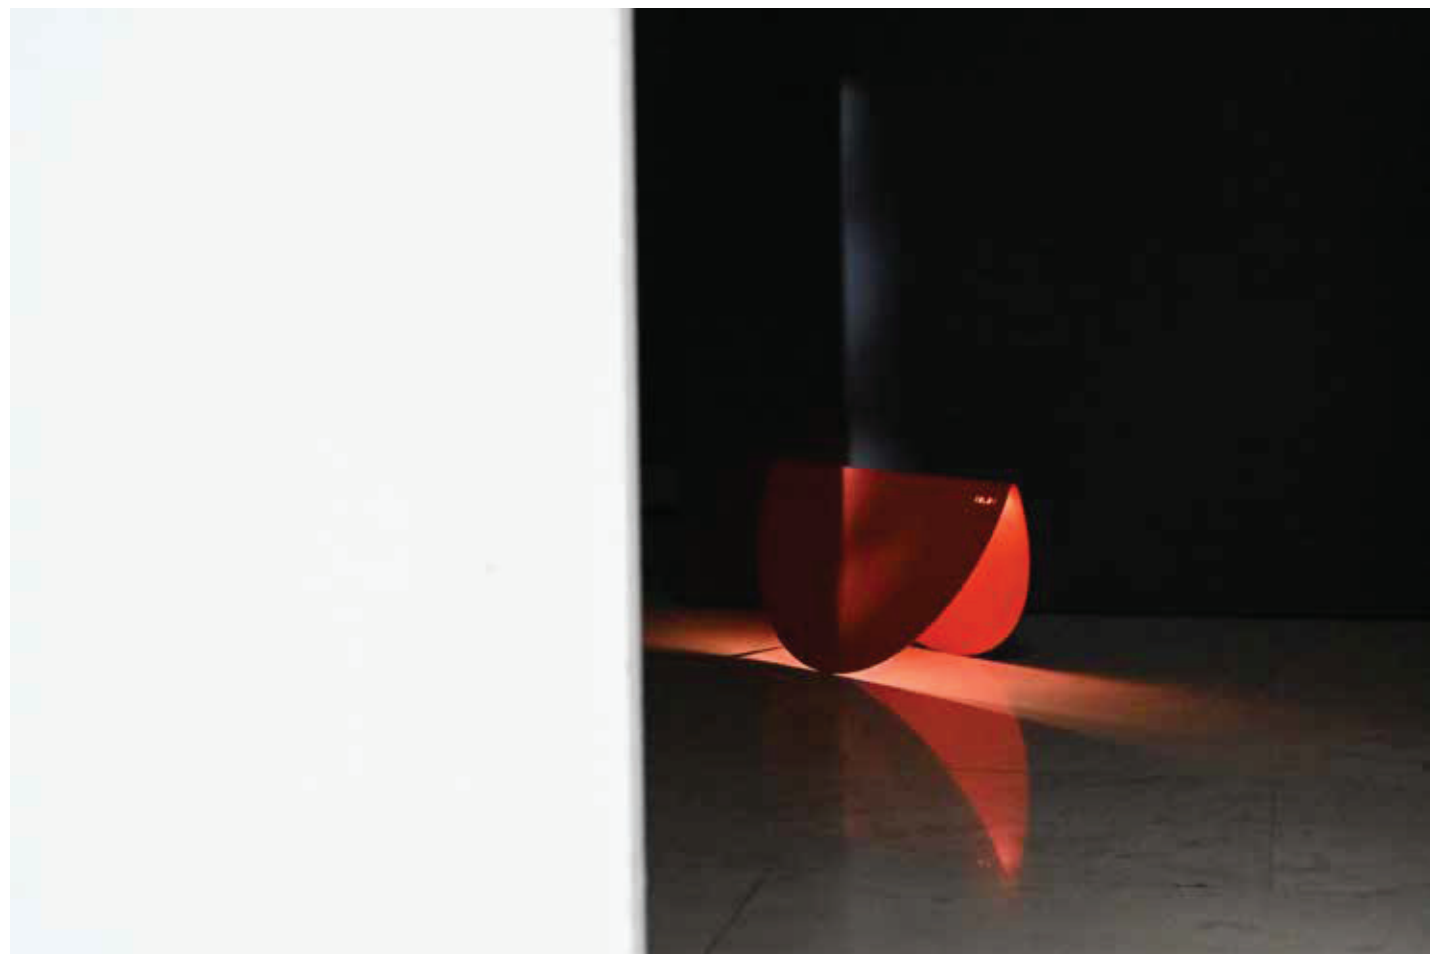

Rocking light
R400 mm
R600 mm Thickness 2 mm
R800 mm
R1000 mm Thickness 3 mm

Material
Body in hot rolled aluminium sheet optionally coloured with a powder coating technique. It has a build-in energy-efficient LED strip with a Lumen Maintenance (Lifetime) of more than 36000 hours.

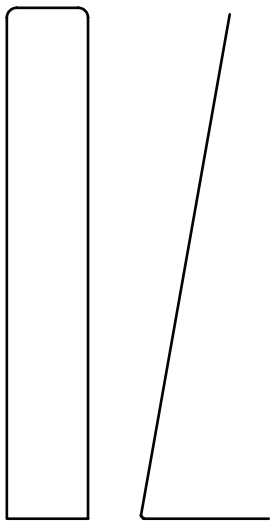

FOLDS

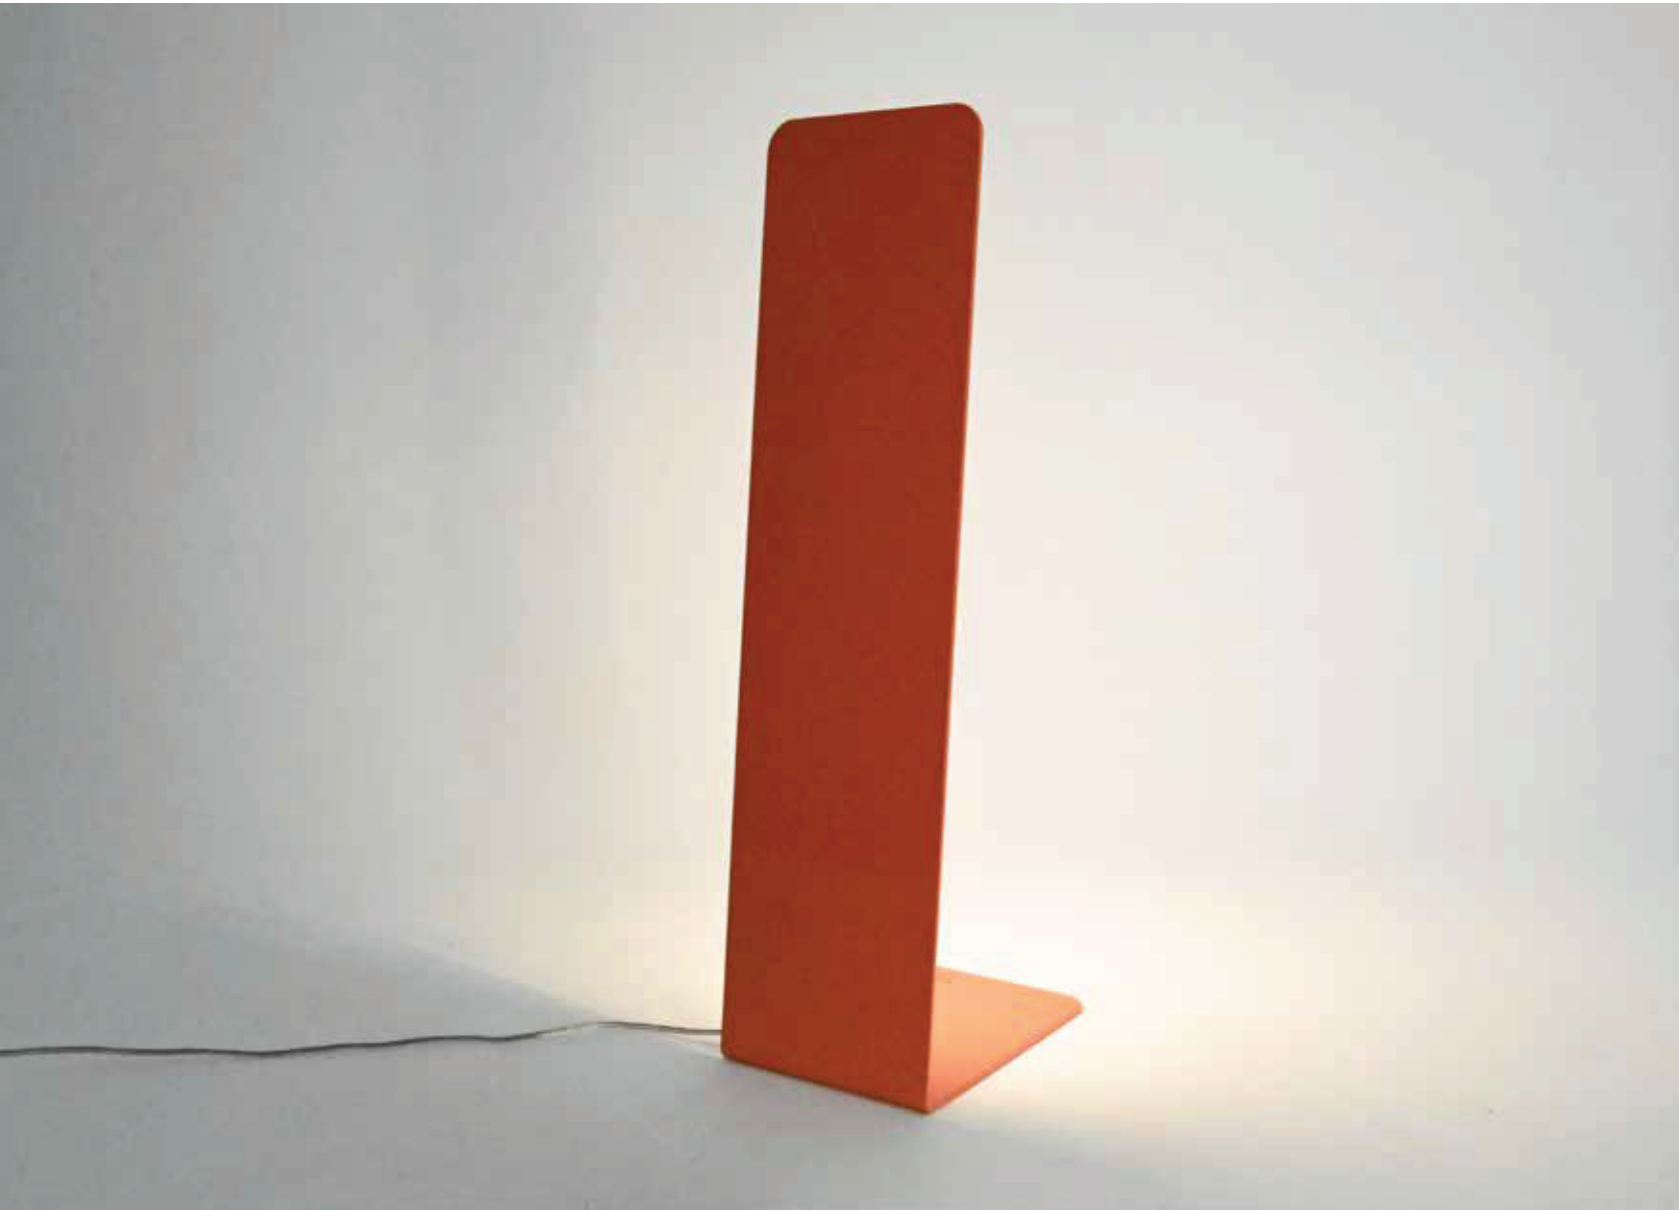

L Light

The long neck versus the short tail creates a constant tension of balance. The ability to regulate the light's intensity enables the creation of multiple perceptions of space and its characteristics. An ambient light serving modern lifestyles using quality craftsmanship and industrial production.

W160 x H400 mm
W160 x H600 mm
W160 x H800 mm
W160 x H1000 mm

Material
L Light's body is made of refined structural steel that is optionally coloured with a powder coating technique. It has a build-in energy-efficient LED strip with a Lumen Maintenance (Lifetime) of more than 36000 hours.

Shelf

A symmetrical body with a satin touch embellishes a strong and supportive appearance suited to fit many needs. Stainless steel combined with a significantly thin design yields an upward or downward rotation. Its round edges contribute to safe shelf mingling environment for any occasion.
