

Hulasol by Solspiration

An outdoor lamp by night, transforming into a parasol by day....

The Hulasol is a brand new outdoor product, designed and developed by the Belgian company Solspiration, it will be launched in 2020-2021 on the world market.

We dedicated five years of our lives to make a totally new 2-in-1 product that can be used day and night and to transform a common product like a parasol. The result is a round and minimalistic design, an innovative and patented opening mechanism, new integrated functionalities like WIFI controlled led light. The Hulasol brings joy, gathers people together and gives outdoor dining and drinking a totally new dimension. We want to revolve the outdoor market with one object, combining beauty and functionality.

The Hulasol is made of top quality outdoor materials. We use premium acrylic fabrics, the central pole is made of stainless steel and the ring is made of lightweight anodized aluminum. The shape of the Hulasol is excellent to withstand various weather conditions.

One product, one focus, one team.
