It's a nice crew of buddies

Related to the architectural and construction sphere, DesignWithGenius or dwg take their name from the file extension “*.dwg” of the design software Autodesk AutoCAD® (as for the “*.jpeg” for pictures or the “*.xls” from Microsoft™ Excel).

In the form of a student collective, dwg started in 2009 with temporary installations during public events followed by tailor-made furniture. Eager to learn, to follow training programs and to increase their experience, this group of friends trained in carpentry, worked as architects for the Ateliers Jean Nouvel (FR), Bureau Dethier Architecture, Greisch, Artau,... and finally joined forces in 2016 to found “DesignWithGenius SPRL”.

Skilled

Having gained strong multidisciplinary skills from all kind of projects, from international projects to furniture for private people, DesignWithGenius offers a full range of to develop hybrid and creative solutions for all issues related to arranging spaces/layouts (outdoor, indoor [homes, stores,...]), temporary installations, place and space scenographies, development of identifiable trademarks, or tailor-made furniture.

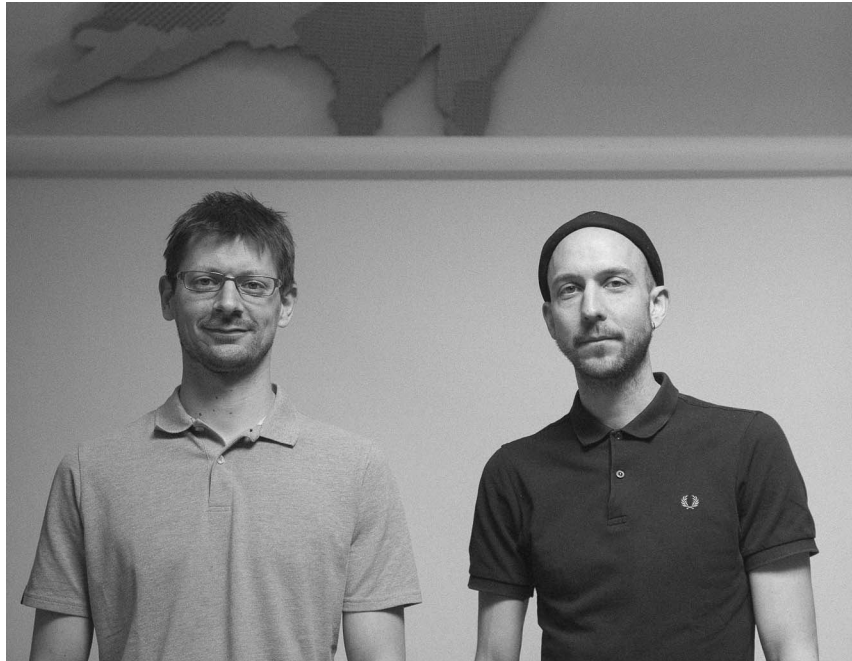

Creative

Always looking to renew their style and curious about everything in their field, DesignWithGenius uses everything they can from their knowledge of the culture in their realisations. The material and the colour of their creations, but also the light effect on their projects are carefully analysed to provide the best suitable and possible solutions.

Mindful

Very sensible to the environment of their work and to the impact of every single one of their actions, DesignWithGenius shows willingness to use their materials at the most of their possibilities to avoid as many waste as possible. This mindful spirit is recognisable in their work and in the development of their projects.

Charming

Built

The workshop

Research, prototyping, transforming and finishing area/place, the workshop allows dwg to meticulously create all kind of tailor-made furniture and some other small series of creations.

Conscientious

The studio

This is on the very nice pedestrian street ("En Neuvise") DesignWithGenius creates, designs, develops and transforms all your dreams / projects into space, layouts, furniture,...
