

Squares Strip Mall

The vision for the project is to build unique and landmark commercial strip mall and boulevard at Southern area of AlKhubar city, Saudi Arabia to attract high level tenants of retail shops and F&B, shops, with dynamic and eye catchy outdoor spaces like terraces, landscape, hardscape, and water features. The project is designed by MOAVAI to the client ALSALIMI

Architect

Mohamed Abdelkader

Squares Strip Mall

An iconic Landmark rose in the centreline of symmetry between the two sides of the project to define it and give it meaning, engraved with Squares mall logo in a way to create a sense of belonging and identity.

The waterfall is an upside-down water feature with RGB lighting at night and sun light at daytimes providing audial and visual effects to the project. users can access the area under the water fall through four gates to find seating tables to enjoy the overall atmosphere created by this element.

The outdoor plaza between Mall masses is semi shaded by a huge shed connected to the waterfall. Outdoor terraces is created by the masses shifting to be used as outdoor areas too. The area is surrounded by several items including seating areas, dancing fountains, lighting trees, and RGB lights.
