MARGAUX DE PENFENTENYO

Landscape Lamp

Each strip evokes the geological strata of a landscape. Their vertical shape echoes the trees covering earth. The colors themselves remind of the earth and the leaves. The light coming from the center of the piece is like the halo of a star. This project is an ode to the beauty of natural landscapes.

Sculpture during the day, light by night, the *Landscape Lamp* can be composed of only one element or various. There are three dimensions available to form a whole composition.

Made up of wood, acrylic painting, cotton, and led strip, the *Landscape Lamp* is an indoor design. Led strip gives a decorative light. Cut numerically, painted by hand, each lamp is a unique piece made in Mexico.

Landscape Lamp collection "blurs the line between fine art and design"

Lizzie Crook | 5 hours ago | [Leave a comment](#)

Margaux de Penfentenyo is launching Landscape Lamp, a sculptural lighting collection, during the [VDF x Ventura Projects](#) collaboration.

Exhibitor: Margaux de Penfentenyo

Project title: Landscape Lamp

Margaux de Penfentenyo is Mexican artist and designer. Her most recent collection is Landscape Lamp, which she is introducing as part of VDF x Ventura Projects.

Landscape Lamp is a lighting collection modelled on geological strata. It comprises sculptural floor [lamps](#) in three different sizes.

Each lamp is handmade using wood, acrylic paint, cotton, and led strips, and punctured by a hollow centre from which the light shines.

According to Penfentenyo, the range "blurs the line between fine art and design", doubling as a tree-like sculpture during the day and a light source at night.
