SCUOLA DI DESIGN

FUTURE OF HUMAN FRAGILITIES @2033

The Final Synthesis Design Studio of the Milan Polytechnic School of Design aimed to adopt a vision on inclusion, equity and human diversity, equipping students with a **new sensitivity and innovative design practices**, suited to the complexity of our times and their constant changeability. Our first goal was dedicated to **define diversities to come (2033)**, the fears and the opportunities that the future presents us, in order to be able to anticipate them, interpret them and make allowance for them. Infact, we want to design a future world of equal opportunities, rights and awareness that all need to be addressed and guided: design has the **ethical task of anticipating socio-cultural** behaviours and trends, not just responding to the market. The **9 meta-design profiles** that emerged were used in subsequent exercises, becoming the shared heritage of the laboratory and the final degree theses.

**MASTER DEGREE IN
INTEGRATED PRODUCT DESIGN
AY 2022/2023
Final Synthesis Design Studio**
