

## *"Eye in the Skye"*

All'Origine, specializing in 20th-century European objects, returns for the third consecutive year as a guest of OTTO Studio with its Pop-Up Shop. The curation follows a dual approach, juxtaposing humble curiosity objects with much more refined pieces. Blown glass from Bohemia, Murano, and the finest European glass-making regions is unashamedly paired with objects drawn from the world of Italian sports bars of the '70s and '80s. The Skye (or vinyl leather) of which some of these items are made becomes a symbol of the most popular productions of the post-war era. Objects such as bocce balls, rackets, boxing gloves, trophies (and many others) combine to evoke the colorful and lighthearted atmosphere of the sports bars of yesteryear.
